Lloyd's Register of Shipping.

The Committee desire to call the attention of subscribers to the alteration in the numbering of the vessels in the Register, which was introduced last year, for convenience in cabling without the use of vessels' names.

In the Register for 1919-20 the numeration employed was from No. 00001 to 36350.

To avoid confusion the numeration in the current Register starts at 40001 (A in Sail) and finishes at 77159 (Z in Steam).

Vessels entered in the supplementary portion will be similarly numbered as part of the same series, A in the supplement—Sail—starting with 46201; and A in the supplement—Steam—starting with 77301.

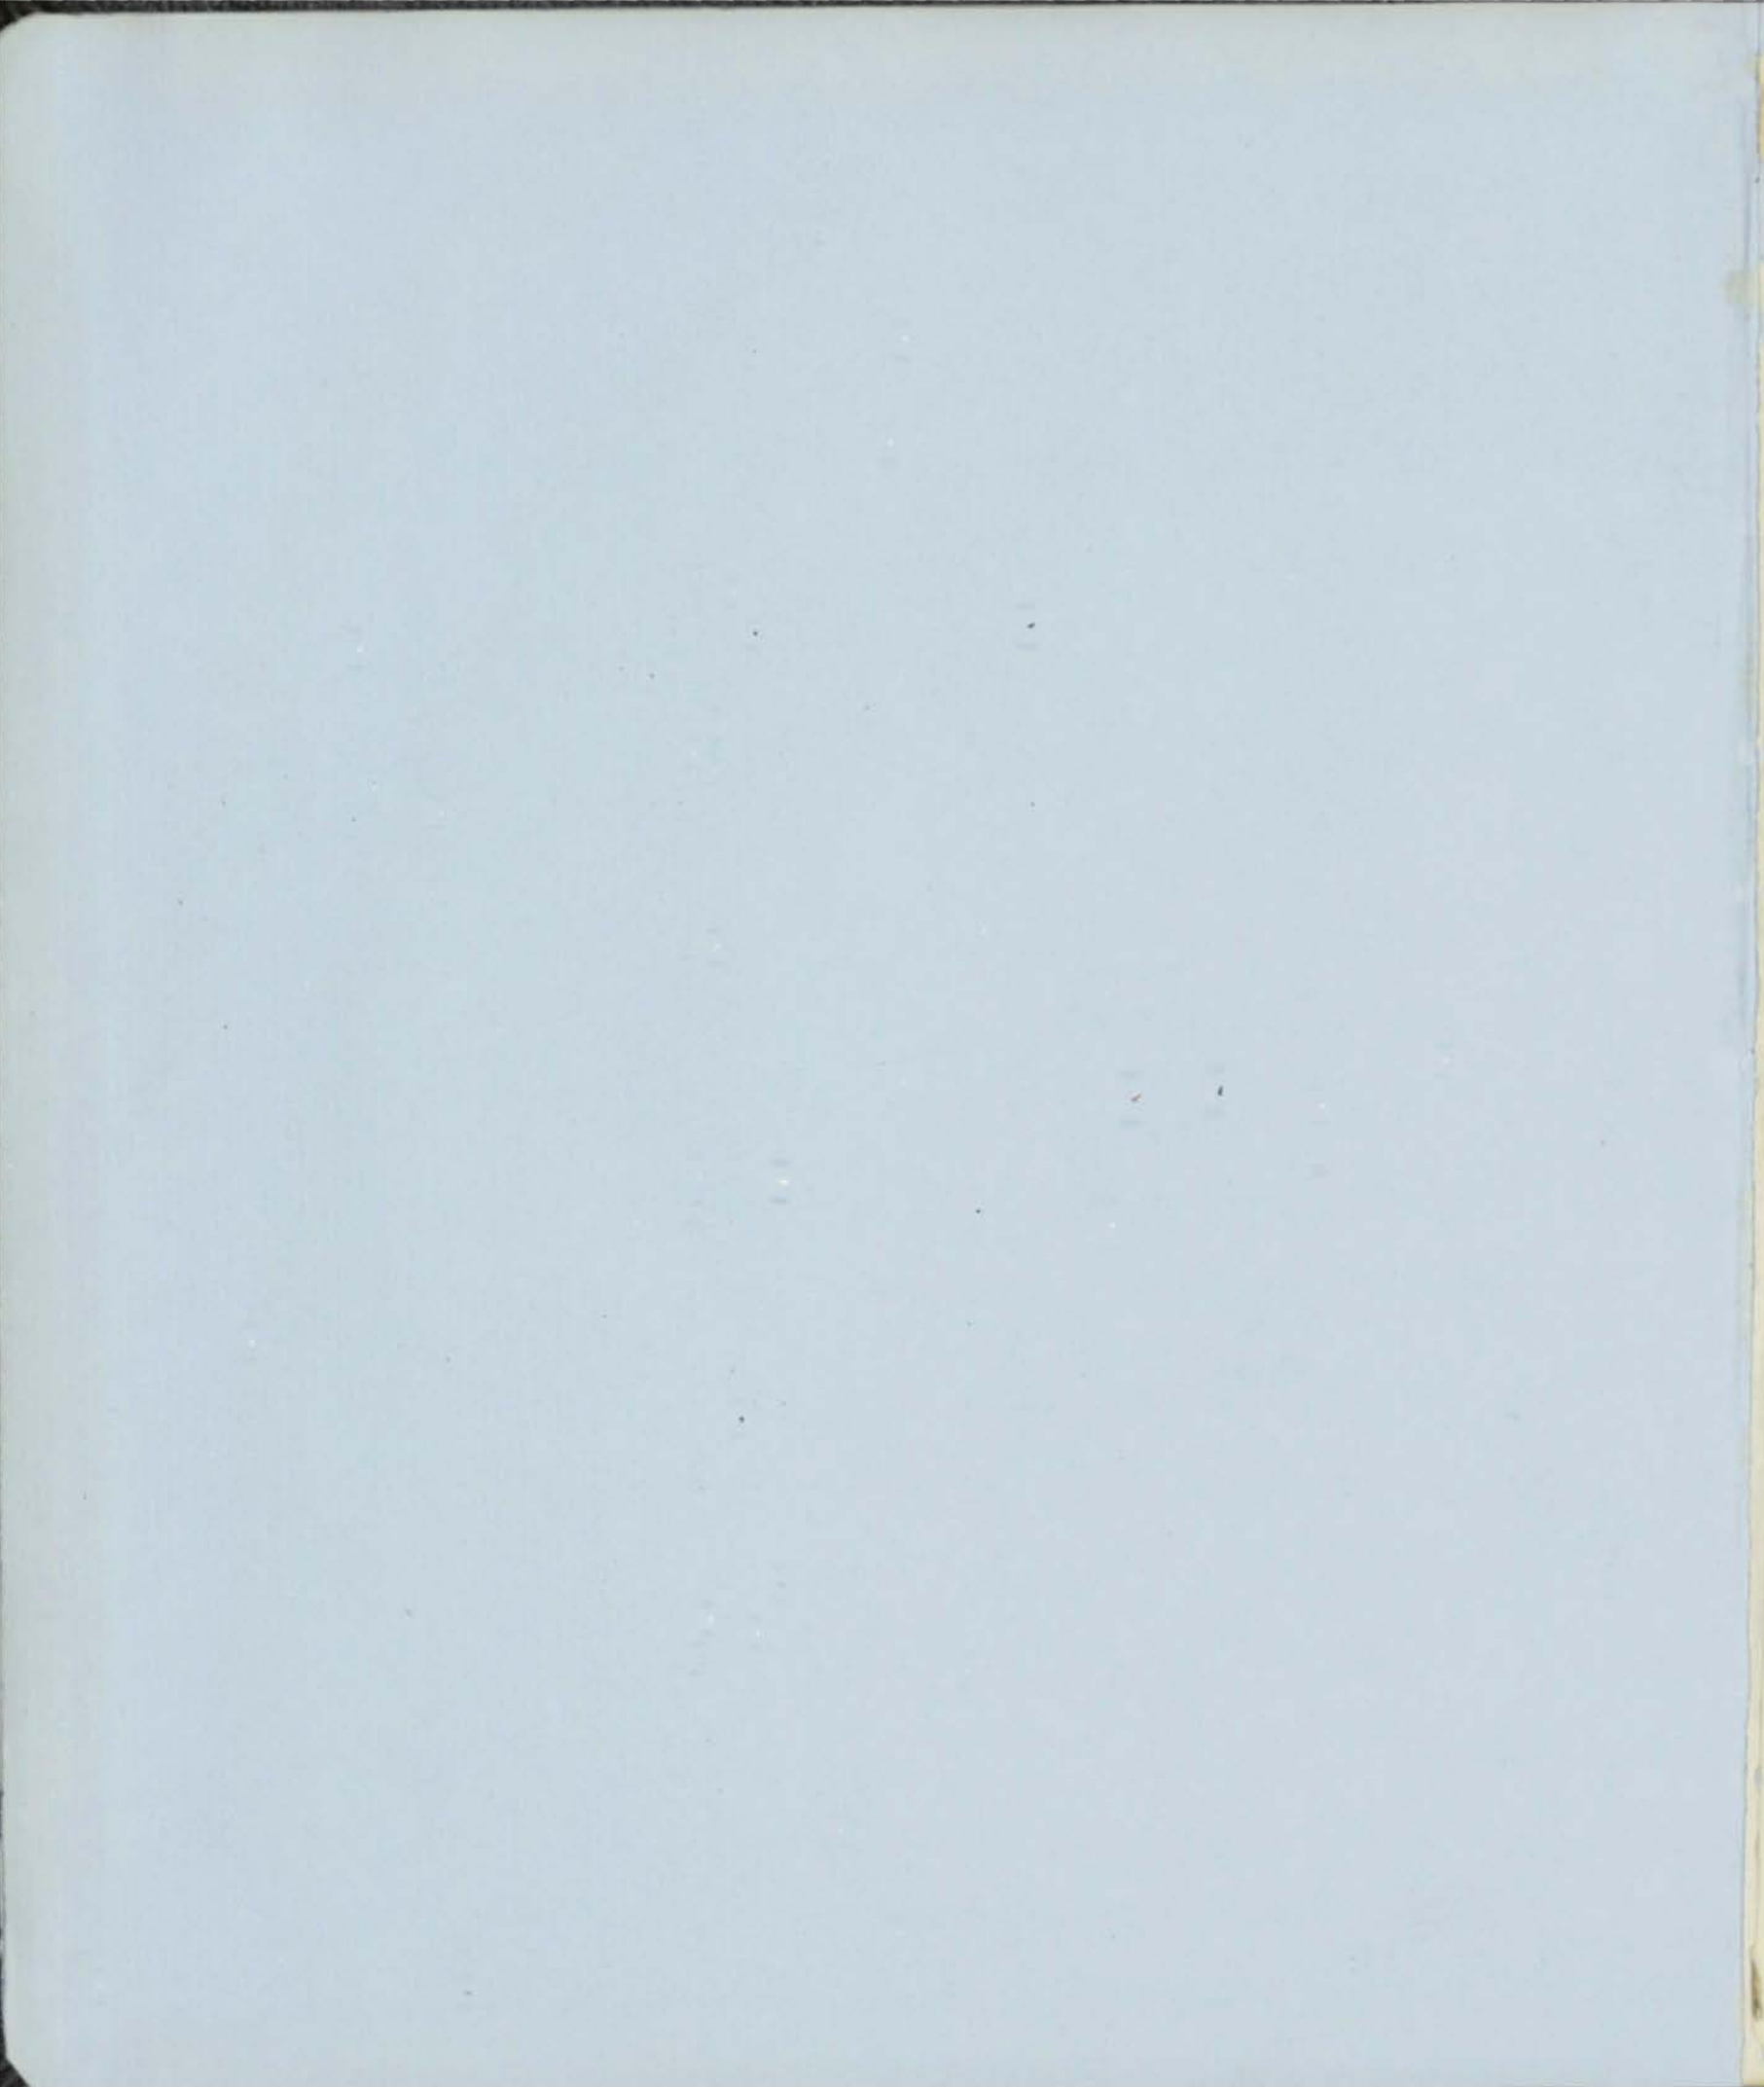

It will also be observed that a list of vessels alphabetically arranged showing the DEADWEIGHT, and CAPACITIES of HOIDS and PERMANENT BUNKERS appears in the supplementary sections and immediately follows the supplementary portion (New Entries) of the List of Sailing Vessels.

These particulars are based on information given on the authority of the Owners, without guarantee, as approximately correct. The Society of Lloyd's Register of Shipping is not responsible for its correctness.

ANDREW SCOTT,

Secretary.

July, 1920.

The Characters used for Classification are:—

100A1 95A1 } Vessels built of Iron or Steel according to the Rules in force since 1869.
90A1 85A1 }
80A1 75A1 }

A1 Iron or Steel vessels built for a special purpose.

*A1 Iron vessels built with thicker plating than required for A1

A1 A1 A1 Iron Vessels built according to Rules in force between 1864 & 1871.

A1 A1 AE1 Wood or Composite Vessels.

The figure 1 affixed to a character signifies that the vessel is well and sufficiently equipped; a line after the character (thus, A—) that the equipment is deficient from that required by the Rules.

The words "with freeboard" under the character signify that the freeboard assigned is a condition of the vessel's class.

Classification of the late Underwriters' Registry.

A1: A1: Iron or Steel Vessels built in excess of Rules of Underwriters' Registry, and of extra quality of Iron.

A1* A1* A1 A1 A A Characters of Iron, Steel, or Composite Vessels built according to the Rules of Underwriters' Registry.

Vessels classed in Red were built under inspection of Surveyors to Underwriters' Registry.

The Classification Cols. when left blank indicate Vessels never classed by the Society.

In Col. 8 (Sailing Vessels), Col. 7 (Steamers) three dots ... indicate that the vessel had a Class at one time, but it has been withdrawn at Owner's request.

In the same Column Lv signifies the classification of the Underwriters' Registry, and the letters a, b, c, &c., indicate the letters and equipment numbers in Tables Nos. 30 and 31 (Rules).

A black line with date under it, in Classification Col. (thus, 3,19), indicates that vessel's character was expunged from Register Book at date specified because, from reported defects, the vessel was not entitled to retain her classification; a red line with date (thus, 3,19), indicates withdrawal of class because of non-compliance with Society's Rules.

A date in Classification Column, without character, indicates that the class has expired, or been withdrawn from absence of Survey, or non-payment of fees.

When a posting of loss, casualty, &c., is made against a classed vessel, the character is expunged thus:—

~~100A1~~

† in the Classification Column signifies that the vessel was built under Special Survey.

LMC —Boilers and Machinery certified by the Engineer Surveyors to Lloyd's Register.

B&MS —Boilers and Machinery Surveyed and reported to be satisfactory by the Engineer Surveyors to Lloyd's Register.

DBS —Donkey Boiler Surveyed and reported to be satisfactory by the Engineer Surveyors to Lloyd's Register. Special Survey of Machinery or Boilers during construction.

Lloyd's RMC —Refrigerating Machinery Certificate denoting that the Refrigerating machinery, insulation, and spare gear are fitted in accordance with the Rules, and were found in good condition by the Surveyors to Lloyd's Register at the time mentioned.

†Lloyd's RMC —The † signifies the Special Survey of the Refrigerating appliances during construction, by the Surveyors to Lloyd's Register.

A&CP.—Anchors and Chains Proved at a Machine recognised by Lloyd's Register.

Lloyd's s&CP.—Anchors and Chains proved at a Public Machine under the superintendence of Lloyd's Register.

SS & ss.—Special Survey. Rest.—Restored.

Cont.—Continued. HT.—Half-Time Survey.

The date of Survey only certifies to the vessel's state of efficiency at that time.

Examined 3,19 —Indicates that a general examination was made at this date in lieu of the overdue special periodical survey which has been postponed for the time being, in the war conditions.

The Characters used for Classification are:—

100A1 95A1 } Vessels built of Iron or Steel
90A1 85A1 } according to the Rules in force
80A1 75A1 } since 1869.

A1 Iron or Steel vessels built for a special purpose.

*A1 Iron vessels built with thicker plating than required for A1

A1 A1 A1 Iron Vessels built according to Rules in force between 1864 & 1871.

A1 A1 A1 Wood or Composite Vessels.

The figure 1 affixed to a character signifies that the vessel is well and sufficiently equipped; a line after the character (thus, A—) that the equipment is deficient from that required by the Rules.

The words "with freeboard" under the character signify that the freeboard assigned is a condition of the vessel's class.

Classification of the late Underwriters' Registry.

A1: A1* Iron or Steel Vessels built in excess of Rules of Underwriters' Registry, and of extra quality of iron.

A1* A1* A1 A1 A A Characters of Iron, Steel, or Composite Vessels built according to the Rules of Underwriters' Registry.

Vessels classed in Red have been built under inspection of Surveyors to Underwriters' Registry.

The Classification Columns, when left blank indicate Vessels never Classed by the Society.

In Col. 8 (Sailing Vessels), Col. 7 (Steamers), three dots ... indicate that the Vessel had a Class at one time, but it has been withdrawn at Owner's request.

In the same Column, Lv signifies the classification of the Underwriters' Registry, and the letters a, b, c, &c., indicate the letters and equipment numbers in Tables Nos. 30 and 31 (Rules).

A black line with date under it in Classification Column (thus 3,19) indicates that vessel's character was expunged from Register Book at date specified because, from reported defects, the vessel was not entitled to retain her classification; a red line with date (thus, 3,19) indicates withdrawal of class because of non-compliance with Society's Rules.

A date in Classification Column, without character, indicates that the Class has expired, or been withdrawn from absence of Survey, or non-payment of fees.

When a posting of loss, casualty, &c., is made against a classed vessel the character is expunged thus:—100A1

✦ in the Classification Column signifies that the vessel was built under Special Survey.

LMO—Boilers and Machinery certified by the Engineer Surveyors to Lloyd's Register.

B&MS—Boilers and Machinery Surveyed and reported to be satisfactory by the Engineer Surveyors to Lloyd's Register.

DBS—Donkey Boiler Surveyed and reported to be satisfactory by the Engineer Surveyors to Lloyd's Register.

✦ Special Survey of Machinery or Boilers during construction.

Lloyd's RMC—Refrigerating Machinery Certificate denoting that the Refrigerating machinery, insulation, and spare gear are fitted in accordance with the Rules, and were found in good condition by the Surveyors to Lloyd's Register at the time mentioned.

✦ Lloyd's RMC—The ✦ signifies the Special Survey of the Refrigerating appliances during construction, by the Surveyors to Lloyd's Register.

A&CP—Anchors and Chains Proved at a Machine recognised by Lloyd's Register.

Lloyd's A&CP—Anchors and Chains Proved at a Public Machine under the superintendence of Lloyd's Register.

SS & R.—Special Survey. Rest.—Restored.

Cont.—Continued. HT.—Half-Time Survey.

The date of Survey only certifies to the vessel's state of efficiency at that time.

Examined 3,19—Indicates that a general examination was made at this date in lieu of the overdue special periodical survey which has been postponed for the time being, in the war conditions.

LLOYD'S REGISTER OF SHIPPING.

1870-71 REGISTER OF SHIPPING

LLOYD'S REGISTER OF SHIPPING.

FOUNDED 1760.

RE-CONSTITUTED 1834.

UNITED WITH THE
UNDERWRITERS' REGISTRY FOR IRON VESSELS IN 1885.

From 1st July, 1920, to the 30th June, 1921.

VOLUME I.—SAILING VESSELS, OWNERS, &c.

The REGISTER,—which is printed solely for the information of Merchants, Shipowners, Underwriters, and others, being Subscribers or Members,—contains the names, classes, and other useful particulars relating to vessels classed by the Society, and those classed by the Underwriters' Registry for Iron Vessels. It also includes as far as possible, the names, dimensions, &c., of all other Merchant Vessels of the World, of 100 tons and upwards, some of which, although not classed by the Society, are classed elsewhere.

The conditions regulating the classification of Vessels in the REGISTER are contained in the Society's Rules.

Extract from the Society's Rules, Section 26:—

“While the Committee use their best endeavours to ensure that the functions of the Society are properly executed, it is to be understood that neither the Committee nor the Society are under any circumstances whatever to be held responsible for any inaccuracy in any report or certificate issued by the Society or its Surveyors, or in any entry in the Register Book or other publication of the Society, or for any error of judgment, default, or negligence of the Surveyors, or other Officers or Agents of the Society.”

LLOYD'S REGISTER OF SHIPPING

AND THE

VERITAS ADRIATICO.

NOTICE.

The Committee of LLOYD'S REGISTER OF SHIPPING and the Commission of the VERITAS ADRIATICO have entered into an agreement for the joint working of the two Institutions with a view to improving the organisation of the Veritas Adriatico and giving the Shipowners of the Adriatic the advantage of being able to class their vessels with both Institutions on the basis of surveys by one organisation only, thus ensuring the utmost economy and convenience.

The Veritas Adriatico having adopted the Rules of Lloyd's Register for Iron and Steel Vessels in their entirety, such vessels can only be classed with the Veritas Adriatico if the Rules of Lloyd's Register have been complied with.

Wooden vessels can be classed by the Veritas Adriatico in accordance with the current Rules of that Institution.

The two Institutions have a common office in Trieste, and the local Technical Staff is appointed by common agreement of the Committee of Lloyd's Register and the Commission of the Veritas Adriatico. At all other ports throughout the World, the Surveying Staff of Lloyd's Register is empowered by the Commission of the Veritas Adriatico to act on its behalf.

KEY TO THE REGISTER.

1920-21.

EXPLANATIONS OF RECORDS IN THE REGISTER BOOK.

(All abbreviations employed in the Register Book are explained in the alphabetical key, see page xxviii.)

Steamers, columns 2 & 3; Sailing Vessels columns 3 & 4.

- Master.** The figures which follow the master's name, thus, *Smith* 97-11, indicate the dates of his appointment (1) as master in the service of the present owner of the vessel, and (2) as master of the vessel herself.
- Decks.** See illustrations of types of vessels, following page xl of key. Explanations of such terms as *Shade dk.*, &c., are included in the alphabetical key, see page xxviii.
- 3 Dk. rule.....** This notation indicates that the vessel has been built according to the Rules for three-decked vessels.
- Special Surveys.** Explanations of records of special periodical surveys will be found in the alphabetical key, see page xxviii. The records only certify to the vessel's state of efficiency *at the time of survey*.
- Ports of Survey.** The contractions (such as *Lon.*, *Syd.*, &c.), used to denote the ports at which vessels have been surveyed, are explained at page xxxii.
- Rig, &c.** Explanations of contractions used to denote the rigs of vessels will be found in the alphabetical key, see page xxviii.
- †** This sign following the word "*salted*" indicates that the vessel's beams have not been salted.

Steamers, column 4; Sailing Vessels column 5.

- Tonnage.** The tonnage recorded in the Register Book in type like that shown at the side hereof, is, with a few exceptions, the official registered tonnage measured according to the law of the country to which the vessel belongs.
- | | |
|--|------------------|
| | 3101 (Gross) |
| | 2864 (Under dk.) |
| | 1994 (Net) |
- For some foreign vessels, the tonnage which is recorded has been measured in accordance with British rules and is accepted under British law. In such cases, the fact is indicated by the use of italic figures, thus:—
- | | |
|--|-------------------------|
| | <i>3101</i> (Gross) |
| | <i>2864</i> (Under dk.) |
| | <i>1994</i> (Net) |

Steamers, columns 5, 6 & 7; Sailing Vessels, columns 6, 7 & 8

Symbols of Classification of Lloyd's Register.

- 100A1 95A1** Characters of vessels built of Iron or Steel according to the Rules of the Society since 1869. The numerals 100, 90A1 85A1 } 90, &c., do not signify terms of years, but are intended for the purpose of comparison only.
- 80A1 75A1** }
- A1** This character (without a numeral prefixed) is assigned to Iron or Steel vessels built for special purposes or trades, to the satisfaction of the Committee
- *A1** Character of Iron vessels built with thicker plating than required for A1.
- A1 A1 A1** Characters of Iron vessels built according to the Rules of the Society in force between the years 1864 and 1871.
- A1** Character of Wood or Composite vessels of the first class well and sufficiently equipped. The figures in column 5 (Steamers), column 6 (Sailing Vessels), prefixed to the character indicate the term of years for which the vessel is at present classed, thus:—11A1, Cont 6A1, Rest 6A1. (See notes in alphabetical key, page xxviii, under "Cont" and "Rest"). The figures in column 7 (Steamers), column 8 (Sailing Vessels) indicate the expired terms of years originally assigned, if on the first line, and assigned on continuation if on lower lines.

- A1** Character of vessels which have passed the period assigned on original Survey, or Continuation, or Restoration, and of vessels not having an original character, which are found to be fit to carry dry and perishable goods. The term of years for which this character is assigned appears under the class in column 5 (Steamers), column 6 (Sailing Vessels), thus:—SSPl. 18-6yrs.
- AE1** Character of vessels fit for conveyance of dry and perishable goods on short voyages. The term of years for which the character AE is assigned appears under the class in column 6 (Sailing Ships), thus:—SSPl. 18-4yrs.
- 1** The figure 1 included with the characters, as printed above, signifies that the vessel is well and efficiently equipped as per Tables 30 & 31 (see the Society's Rules).
-** This sign placed after a character, in the position usually occupied by the figure 1, indicates that the equipment of the vessel—either as regards its quality or its quantity—does not fulfil the requirements of the Society's Rules.
- †** This sign denotes that the vessel has been built under Special Survey.
- +** This sign denotes that the engines or the boilers, or both (according to the record which follows) have been built under Special Survey.
- 3,19** A black line, with date underneath, indicates that the vessel's character was expunged from the Register Book at the date specified because from reported defects the vessel was not entitled to retain her classification.
- 3,19** A red line, with date underneath, indicates that the vessel's character was expunged from the Register Book at the date specified because from non-compliance with the Society's Rules as regards surveys, the vessel was not entitled to retain her classification.
-** This sign in column 7 (Steamers), column 8 (Sailing Vessels), indicates that the vessel's class was withdrawn from the Register Book at the Owner's request.
- 100A1** When a posting of loss, condemnation, casualty, &c., is made against a classed vessel, the character is expunged in this manner.

with freeboard This notation under the character signifies that the freeboard assigned is a condition of the vessel's class.

For tug purposes, Traveler, &c. Such notations under the character indicate the special trade or purpose for which the vessel is intended and in view of which she has been classed by the Society.

Awng dk., Shade dk., &c. See illustrations of types of vessels, following page xl of key. Explanations of such terms as shade deck, awning deck, &c., are included in the alphabetical key to the abbreviations, see page xxviii.

Symbols of Classification of the late Underwriters' Registry.

(Amalgamated with Lloyd's Register in 1886.)

- A1; A1* ..** Characters of Iron or Steel vessels built in excess of the Rules of the Underwriters' Registry and of extra quality of Iron.
- A1* A1* } Characters of Iron, Steel, or Composite vessels built**
A1, A1, ... } according to the Rules of the Underwriters' Registry.
A, A, ... }

Vessels classed in red were built under the inspection of the Surveyors to the Underwriters' Registry.

The figure 1 or 2 affixed to Symbols of Classification signifies the Character of Equipment.

Last date of Survey. The figures under a character denote the date when the vessel was last surveyed. The *date of survey* only certifies to the vessel's state of efficiency *at that time*.

Examined 3,19—Indicates that a general examination was made at this date in lieu of the overdue special periodical survey which has been postponed for the time being, in the war conditions.

Ports of Survey. An explanation of contractions used to indicate surveying ports will be found on page xxxii. The 6th, 7th, and 8th columns (Sailing Vessels), or 5th, 6th, and 7th columns (Steamers) left blank, indicate that the vessel has never been classed in the Register Book. When the 6th (Sailing Vessels) or 5th (Steamers) column is left blank, except as regards the date of survey last recorded, it indicates that the character has expired, or that it has been withdrawn either for want of survey or on account of non-payment of fees due in the case.

Steamers, column 7*.

Date when the Tail Shaft was last seen. The letter N preceding the date of last survey of the tail shaft (thus N 10,18) indicates that the tail shaft was *new* at that time. The letters P and S indicate respectively the last survey of *port* and *starboard* shafts.

Steamers, column 7*. Sailing Vessels, column 17.

Mean Drafts. The figures in the columns represent the mean drafts corresponding to an immersion of 65, 70, 75, and 80 per cent. respectively, as assigned by the late Underwriters' Registry, but these drafts do not indicate approved load lines.

Steamers, column 8; Sailing Vessels, column 9.

Date of Build. In the case of Iron and Steel vessels classed by Lloyd's Register, the last date of survey for first entry of classification is reckoned as the date of build when such survey is completed within six months of the date of launching for vessels under 10,000 tons gross, nine months for vessels of 10,000 tons and under 20,000 tons gross, and twelve months for vessels of 20,000 tons gross and upwards. When however, the first entry survey is not completed within the period allowed, the date of build will be taken as six, nine, or twelve months after the date of launching, as the case may be. In the case of classed Iron and Steel vessels launched prior to the 19th May, 1887, and also in the case of all classed Wood and Composite vessels, the date of launch is reckoned as the date of build. In the case of vessels not classed by Lloyd's Register, it is not possible to define in all cases whether the date of build is the date of launch or the date of completion.

Records such as 18½ occur in the case of some unclassified vessels. These denote that the vessel was originally built at the date indicated by the upper figures, and is reported to have been rebuilt at the date indicated by the lower figures. In such cases, the Society has no authoritative information as to the extent to which the reported rebuilding has been carried out. Rebuilding of vessels, when carried out under the inspection and to the satisfaction of the Society's Surveyors, is recorded thus:—"rebuilt 12."

Steamers, column 10; Sailing Vessels, column 12.

Owners. In the case of vessels belonging to the United Kingdom, the name recorded in the Register Book is that of the Managing Owner, or of the firm in which the Managing Owner is a partner. When there is not a Managing Owner appointed, the name of the largest shareholder is recorded; and the name of the Manager of the vessel is also noted if desired. For colonial or foreign vessels, it is endeavoured to follow the same practice as for United Kingdom vessels; but obvious difficulties render it impossible to ensure that a person entered as Managing Owner is really a legal owner. He may therefore sometimes be only the *Manager* of a vessel as distinguished from the *Managing Owner*.

Steamers, column 11; Sailing Vessels, column 13.

Dimensions. The Registered dimensions of vessels in these columns are recorded in feet and tenths of a foot.

Breadth. Where two breadths are recorded, thus: $\frac{32.5}{34.0}$ the upper figures denote the breadth according to the Official Register of the vessel, and the lower figures the full breadth of the vessel.

Depth. When two depths are recorded, thus: $\frac{16.9}{24.2}$ the upper figures denote the depth to main deck and the lower figures the depth to the upper, spar, awning or shelter deck. This practice is most frequently adopted in the cases of vessels which have a spar, awning or shelter deck.

Deck Erections. See illustrations of types of vessels, following page xl.

Water Ballast. See explanations and illustrations on page xxxi of key.

Steamers, column 12; Sailing Vessels, column 14.

Water Ballast. See explanations and illustrations on page xxxi of key.

Steamers, column 13.

All contractions used in relation to Engines, Boilers, Furnaces, &c., are explained in the alphabetical key, see page xxviii.

Nominal Horse Power. The formulæ from which the Nominal Horse Powers are calculated are:—

NHP

1. In cases of vessels in which the particulars of boiler pressures and surfaces are known:—

$$NHP = \frac{P + 340}{1000} \left(\frac{D^2 \sqrt{s}}{100} + \frac{H}{15} \right) \text{ where the boiler pressure is below 160 lb.}$$

$$= \frac{P + 590}{1500} \left(\frac{D^2 \sqrt{s}}{100} + \frac{H}{15} \right) \text{ where the boiler pressure is 160 lb or above.}$$

If the boilers are fitted with Forced Draught or Induced Draught appliances, then $\frac{H}{12}$ is taken instead of $\frac{H}{15}$.

2. In cases where particulars of the boiler pressures and heating surfaces are not known:—

$$NHP = \frac{D^2 \sqrt{s}}{100} \text{ for Triple and Quadruple Expansion Engines}$$

$$NHP = \frac{D^2 \sqrt{s}}{120} \text{ for Compound Engines.} \quad NHP = \frac{D^2 \sqrt{s}}{130} \text{ for Simple Engines.}$$

In the above Rules, D = diameter of L.P. Cylinder in inches. S = Stroke in inches. H = Heating surface in square feet. P = Working pressure in lb per square inch.

In vessels fitted with Diesel Engines:—

$$NHP = \frac{N \times D^2 \sqrt{s}}{80} \text{ in the case of single-acting engines of the 4 cycle type,}$$

$$= \frac{N \times D^2 \sqrt{s}}{40} \text{ in the case of single-acting engines of the 2 cycle type,}$$

$$= \frac{N \times D^2 \sqrt{s}}{20} \text{ in the case of double-acting engines of the 2 cycle type.}$$

where D = diameter of cylinder in inches, S = stroke of piston in inches in ordinary reciprocating engines, = twice the stroke of piston in the case of engines of the "Junker" type, N = number of cylinders.

In vessels fitted with Internal Combustion Engines other than Diesel type:—

$$NHP = \frac{BHP}{3.5} \text{ where BHP is the Brake Horse Power at full power.}$$

Registered Horse Power. This note shows that the horse power given is the nominal horse power as recorded in the Official Register of the vessel.

Oil and Gas Engines. 4S.C. denotes 4-stroke cycle. SA denotes single acting. 2S.C. denotes 2-stroke cycle. DA denotes double acting.

Water Ballast. See explanations and illustrations on page xxxi of key.

Steamers, column 14; Sailing Vessels, column 15.

Moulded Depth. The moulded depth of an Iron or Steel vessel is the perpendicular depth taken from the top of the upper deck beam at side, at the middle of the length of the vessel, to the top of the keel and the bottom of the frame at the middle line. In Wooden and Composite vessels the moulded depth is the perpendicular depth from the top of the upper deck beam at the side of the vessel amidships to the lower edge of the rabbet of the keel.

In Wooden and Composite vessels where the lower part of the midship transverse section is of a hollow character (as in cases where thick garboard strakes are fitted) the moulded depth is measured from the point where the line of the flat of the bottom cuts the keel. Fractions of an inch are not recorded.

Draught. The "corresponding draught" is the mean draught of water from bottom of keel to centre of load line disc. Fractions of an inch are not recorded.

Steamers column. 15; Sailing Vessels, column 16.

For explanations of symbols used to denote the Registers in which a vessel is classed (if she is not classed in Lloyd's Register Book), see alphabetical key, page xxviii.

Board of Trade Passenger Certificate. The note "till 6,20" indicates that the certificate expires at the date specified, June 1920.

TABLE EXPLICATIVE CONCERNANT LE REGISTRE.

1920-21.

EXPLICATIONS DES ANNOTATIONS DU "LLOYD'S REGISTER BOOK."

(Toutes les abréviations du "Lloyd's Register Book" se trouvent expliquées dans la Table Explicative, voir page xxxvi.)

Navires à Vapeur, colonnes 2 et 3; Navires à Voiles, colonnes 3 et 4.

- Capitaine.** Les chiffres à la suite du nom du capitaine, ainsi, *Smith* 97-11, indiquent (1^{re}) l'année où il est entré comme capitaine au service de l'armateur, (2^{de}) l'année où il a pris le commandement du navire.
- Ponts.** Voir les dessins des différents types de navires à la suite de la page xl de la Table Explicative. Les explications des termes tels que *shade dk.*, etc., sont fournies dans la Table Explicative, voir page xxxvi.
- 3 Dk. rule** Cette annotation indique que le navire a été construit d'après les règlements pour les navires à trois ponts. (Section 41, navires en fer et en acier.)
- Visites Périodiques.** L'explication de l'enregistrement des visites spéciales périodiques se trouve dans la Table Explicative, voir page xxxvi. L'enregistrement indique seulement la condition du navire à l'époque de la visite.
- Ports de Visite.** Les abréviations telles que (Lon., Syd., &c.), employées pour indiquer les ports où les navires ont été inspectés, sont expliquées à la page xl.
- Grément, etc.** Les abréviations employées pour spécifier le grément des navires sont expliquées dans la Table Explicative, voir page xxxvi.
- †** Ce signe à la suite du mot "*salted*" indique que les barrots du navire n'ont pas été salés.

Navires à Vapeur, colonne 4; Navires à Voiles, colonne 5.

- Tonnage.** Le tonnage qui figure sur le "Lloyd's Register Book" en caractères comme ci-contre, est à part quelques rares exceptions, le tonnage officiel mesuré d'après les lois du pays auquel le navire appartient.
- Pour quelques navires étrangers, le tonnage qui figure a été mesuré d'après la méthode Anglaise, et est reconnu par la loi Anglaise. Dans ce cas le fait est mentionné par l'emploi de caractères italiques, comme ci-contre.

Marques de Classification du Lloyd's Register.

- 100A1 95A1** { Cotes des navires en fer ou en acier, construits conformément aux règlements de la Société depuis 1869. Les nombres 100, 90, &c., n'indiquent pas une période d'années, mais ne servent que de termes de comparaison.
- 90A1 85A1** {
- 80A1 75A1** {
- A1** Cette cote non précédée d'un nombre, s'applique aux navires en fer ou en acier, construits à la satisfaction du Comité pour des usages ou des voyages spéciaux.
- *A1** Cote des navires en fer construits avec des tôles plus épaisses que celles réclamées pour la cote **A1**.
- A1 A1 A1** Cotes des navires en fer construits conformément aux règlements de la Société en vigueur de 1864 à 1871.
- A1** Première cote des navires en bois ou composites dont l'armement est bon et suffisant. Les chiffres qui précèdent la cote, colonne 5 (navires à vapeur), colonne 6 (navires à voiles), indiquent le nombre d'années pour lesquelles le navire a été coté, ainsi :—11A1, Cont 6A1, Rest 6A1. (Voir "Cont" et "Rest" dans la Table Explicative, page xxxvi.) Les chiffres dans la colonne 7 (navires à vapeur), colonne 8 (navires à voiles), indiquent les périodes expirées pour lesquelles les navires avaient été cotés. A la première ligne ces chiffres indiquent la période originelle, aux lignes suivantes les périodes de continuation.

- A1** Cote des navires pour lesquels les périodes assignées soit originellement, soit par Continuation ou par Restauration sont expirées, ou cote des navires qui n'ont jamais eu de cote originelle mais qui sont jugés aptes à transporter des marchandises sèches et périssables. Le nombre d'années pour lesquelles la cote a été assignée figure sous la cote dans la colonne 5 (navires à vapeur), colonne 6 (navires à voiles), ainsi :—SSPly.18-6yrs.
- AE1** Cote des navires aptes à transporter des marchandises sèches et périssables pour de courtes traversées. Le nombre d'années pour lesquelles la cote AE a été assignée, figure sous la cote dans la colonne 6 (navires à voiles), ainsi :—SSPly.18-4yrs.
- 1** Le chiffre 1 imprimé comme ci-contre et faisant partie de la cote, indique que le navire a un armement bon et suffisant conformément au Tabl. 30 & 31 (voir règlements de la Société).
- Ce signe à la suite d'une cote, à la place occupée par le chiffre 1, indique que l'armement du navire ne répond pas aux exigences des règlements de la Société, soit comme qualité, soit comme quantité.
- +** Ce signe indique que le navire a été construit sous surveillance spéciale.
- +** Ce signe indique que les machines ou les chaudières, ou toutes les deux (suivant l'annotation dont il est suivi) ont été construites sous surveillance spéciale.
- 3.19** Une ligne noire avec date au-dessous, indique que la cote du navire a été retirée du "Lloyd's Register Book," le navire ne pouvant conserver sa cote par suite de déficiences signalées.
- 3.19** Une ligne rouge avec date au-dessous, indique que la cote du navire a été retirée du "Lloyd's Register Book," le navire ne pouvant conserver sa cote par suite de dérogation aux règlements de la Société en ce qui concerne les visites.
- ...** Ce signe dans la colonne 7 (navires à vapeur), colonne 8 (navires à voiles), indique que la cote du navire a été retirée du "Lloyd's Register Book" à la demande de l'armateur.
- 100A1** Quand un navire coté est mentionné comme perdu, condamné ou ayant tout autre accident, &c., la cote est rayée comme ci-contre.
- with freeboard** Cette mention sous la cote indique que le franc-bord assigné est une condition de la cote du navire.
- "For tug purposes,"** Cette mention sous la cote indique les voyages ou les usages spéciaux auxquels le navire est affecté et en vue desquels il a été classé par la Société.
- "Trawler," &c.** Voir les dessins des différents types de navires à la suite de la page xl de la Table Explicative. Les explications des termes tels que *shade deck*, *awning deck*, &c., sont données dans la Table Explicative, voir page xxxvi.

Marques de Classification de l'ex Underwriters' Registry.

(Réuni avec le Lloyd's Register en 1883.)

- A1; A1*** Cotes des navires en fer ou en acier construits avec des échantillons plus forts que ceux exigés par les règlements de l'Underwriters' Registry et avec des fers de qualité extra.
- A1* A1*...** { Cotes des navires en fer, en acier ou composites, construits conformément aux règlements de l'Underwriters' Registry.
- A1, A1,...** {
- A, A,...** {
- Les navires cotés en rouge ont été construits sous la surveillance des Inspecteurs de l'Underwriters' Registry. Les chiffres 1 et 2 à la suite des marques de classification indiquent la cote de l'armement.
- Date de dernière Visite.** Les chiffres sous une cote indiquent la date de dernière visite. La date de visite certifie seulement la condition du navire à ce moment.

Examiné 3,19 — Indique qu'un examen général a été fait à cette date, au lieu de la visite spéciale périodique en retard, qui a été remise pour le moment, à cause des exigences de la guerre.

Ports de Visites. Les abréviations employées pour indiquer les ports de visites sont expliquées à la page xl.
Les 6^{me}, 7^{me}, et 8^{me} colonnes (navires à voiles) ou les 5^{me}, 6^{me}, et 7^{me} colonnes (navires à vapeur) laissées en blanc, indiquent que le navire n'a jamais été coté dans le "Lloyd's Register Book."
La 6^{me} colonne (navires à voiles) ou la 5^{me} colonne (navires à vapeur) laissée en blanc, sauf en ce qui concerne l'époque de la dernière visite enregistrée, indique que la cote est expirée ou bien qu'elle a été rayée soit pour manque de visite, soit pour non paiement des honoraires dûs dans ce cas.

Navires à Vapeur, colonne 7*.

Date de la dernière Visite de l'arbre La lettre N précédant la date de la dernière visite de l'arbre porte-hélice (par exemple N 10,18) signifie qu'on a mis à la date indiquée un arbre porte-hélice neuf. Les lettres P & S serviront à désigner respectivement les arbres porte-hélice de porte-hélice. *Bâbord* et de *Tribord*.

Navires à Vapeur, colonne 7* ; Navires à Voiles, colonne 17.

Tirants d'eau moyens. Les chiffres qui figurent dans ces colonnes représentent les tirants d'eau moyens correspondant aux immersions de 65, 70, 75 et 80 pour cent. tels qu'ils ont été assignés par l'ex-Underwriters' Registry, mais ces tirants d'eau n'indiquent pas les lignes de charge approuvées.

Navires à Vapeur, colonne 8 ; Navires à Voiles, colonne 9.

Date de Construction. Pour les navires en fer et en acier cotés par le Lloyd's Register, la date de la dernière visite d'inspection pour l'entrée en cote est considérée comme étant la date de construction, à condition que la susdite visite soit passée dans les six mois qui suivent la date du lancement pour les navires d'un jaugeage brut inférieur à 10,000 tonneaux ; dans les neuf mois pour ceux d'un jaugeage brut de 10,000 tonneaux et au-dessus, mais inférieur à 20,000 tonneaux, et dans les douze mois pour ceux d'un jaugeage brut de 20,000 tonneaux et au-dessus. Cependant, si l'inspection pour l'entrée en cote n'est pas terminée durant la période stipulée, la date de construction est calculée six, neuf ou douze mois après celle du lancement, suivant le cas. Pour les navires en fer et en acier cotés et lancés antérieurement au 19 Mai 1887, ainsi que pour tous les navires cotés en bois et composites, la date du lancement est considérée comme étant celle de la construction. Pour les navires non cotés par le Lloyd's Register, il n'est pas possible dans tous les cas de spécifier si la date de construction est celle du lancement ou celle de l'achèvement des travaux.

Des annotations telles que 18½ figurent pour quelques navires non cotés. Les chiffres supérieurs indiquent alors la date originelle de la construction, les chiffres inférieurs la date à laquelle le navire a été rapporté comme reconstruit. Dans ce cas la Société ne peut spécifier l'importance de la reconstruction.

Navires à Vapeur, colonne 10 ; Navires à Voiles, colonne 12.

Armateurs. Pour les navires appartenant au Royaume Uni, le nom qui figure sur le "Lloyd's Register Book" est celui de l'armateur-gérant ou celui de la Société dont l'armateur-gérant fait partie. Lorsqu'il n'y a pas d'armateur-gérant, le nom qui figure est celui du plus gros actionnaire et le nom du gérant figure aussi si on le demande. Pour les navires coloniaux et étrangers, l'on a essayé de suivre le même usage que pour les navires du Royaume Uni, mais de sérieuses difficultés empêchent de certifier qu'une personne mentionnée comme étant armateur-gérant est aussi en réalité armateur légal. Dans certains cas par conséquent, la personne dont le nom figure peut n'être que gérant ce qui est absolument distinct d'armateur-gérant.

Navires à Vapeur, colonne 11 ; Navires à Voiles, colonne 13.

Dimensions. Les dimensions de douane des Navires, dans ces colonnes sont indiquées en pieds et en dixièmes de pieds.

Largeur. Quand deux largeurs sont mentionnées, ainsi 32.5 34.0 les chiffres supérieurs indiquent la largeur d'après le Registré Officiel du navire, et les chiffres inférieurs la largeur extrême du navire.

Creux. Quand deux creux sont mentionnés, ainsi 16.9 24.2 les chiffres supérieurs indiquent le creux au pont principal et les chiffres inférieurs le creux au pont supérieur des navires spar, awning ou shelter deck. Cet usage s'applique surtout aux navires spar, awning ou shelter deck.

Constructions sur les Ponts. Voir les dessins des différents types de navires à la suite de la page xl.

Navires à Vapeur, colonne 13.

Toutes les abréviations employées se rapportant aux Machines, Chaudières, Foyers, &c., sont décrites dans la Table Explicative, voir page xxxvi.

Force en Chevaux nominaux La force en chevaux nominaux est calculée d'après les formule suivantes :—

1°. Si les pressions et les surfaces de chauffe sont connues :—

$$NHP = \frac{P + 340}{1000} \left(\frac{D^2 \sqrt{s}}{100} + \frac{H}{15} \right) \text{ pressions au-dessous de 160 livres.}$$

$$= \frac{P + 590}{1500} \left(\frac{D^2 \sqrt{s}}{100} + \frac{H}{15} \right) \text{ pressions de 160 livres et au-dessus.}$$

Pour les chaudières à tirage forcé on devra substituer dans les formules ci-dessus, $\frac{H}{12}$ à $\frac{H}{15}$.

2°. Si les pressions et les surfaces de chauffe ne sont pas connues :—

$$NHP = \frac{D^2 \sqrt{s}}{100} \text{ Machines à Triple et Quadruple expansion}$$

$$NHP = \frac{D^2 \sqrt{s}}{120} \text{ Machines Compound.} \quad NHP = \frac{D^2 \sqrt{s}}{130} \text{ Machines Simples.}$$

Dans les formules ci-dessus D = diamètre en pouces du Cylindre B.P. s = Course du piston en pouces. H = Surface de chauffe en pieds carrés. P = Pression de travail en livres par pouce carré.

Pour les navires pourvus de moteurs Diesel :—

$$NHP = \frac{N \times D^2 \sqrt{s}}{80} \text{ pour les moteurs à 4 temps et à simple effet,}$$

$$= \frac{N \times D^2 \sqrt{s}}{40} \text{ pour les moteurs à 2 temps et à simple effet,}$$

$$= \frac{N \times D^2 \sqrt{s}}{20} \text{ pour les moteurs à 2 temps et à double effet.}$$

Dans les formules ci-dessus :—D = diamètre du cylindre, en pouces. s = course du piston pour les machines alternatives ordinaires, en pouces. = deux fois la course du piston pour les machines du système "Junker". N = nombre de cylindres.

Pour les navires pourvus de machines à combustion interne, autres que des moteurs Diesel :—

$$NHP = \frac{BHP}{3.5} \text{ formule dans laquelle BHP représente les chevaux en frein à toute force.}$$

Force Officielle en Chevaux Cette annotation indique la force en chevaux nominaux d'après le Registré Officiel du navire.

Machines à pétrole et à gaz. 4S.C. indique Cycle à 4 temps. SA indique simple effet. 2S.C. indique Cycle à 2 temps. DA indique double effet.

Water Ballast. Voir explications et dessins à la page xxxix de la Table Explicative.

Navires à Vapeur, colonne 14 ; Navires à Voiles, colonne 15.

Creux sur quille. Le creux sur quille pour les navires en fer et en acier, est la longueur de la perpendiculaire abaissée depuis la face supérieure des barrots du pont supérieur sur le coté et au milieu de la longueur du navire, jusqu'à hauteur de la rencontre de la face inférieure de la membrure avec le dessus de la quille sur la ligne médiane. Pour les navires en bois et composites, le creux sur quille est la longueur de la perpendiculaire abaissée depuis la face supérieure des barrots du pont supérieur jusqu'à hauteur de l'arête inférieure de la rablure de quille. Pour les navires en bois et composites dont les parties inférieures sont frégatées (lorsqu'un navire est pourvu par exemple de galbords épais) le creux sur quille n'est alors calculé que jusqu'à hauteur de l'intersection de la ligne prolongée des fonds avec la quille. Les fractions d'un pouce ne sont pas mentionnées.

Tirant d'eau. Le tirant d'eau correspondant mentionné est le tirant d'eau moyen du fond de la quille jusqu'au centre du disque de la ligne de flottaison. Les fractions d'un pouce ne sont pas mentionnées.

Navires à Vapeur, colonne 15 ; Navires à Voiles, colonne 16.

Pour l'explication des marques employées pour indiquer les différents Registres auxquels un navire est coté (s'il n'est pas coté au Lloyd's Register), voir Table Explicative page xxxvi

Certificat à passagers, délivré par le "Board of Trade." Cette annotation "till 6,20" indique que le certificat expire à la date mentionnée, Juin 1920.

*. * Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

*. * Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

*. Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their character from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

* * Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

*. Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

*. Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

*. Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyor periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machines, required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

*. * Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

* * Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

* * * Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

*. * Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

* * Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or Machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The Date of Survey of a Ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving Notice of Periodical Surveys required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

LIST
OF
SHIP OWNERS AND MANAGERS.

NOTE.—This List consists chiefly of the Names of Managing Owners. It therefore does not include the names of some large Owners of Shipping Property, or form a true indication of the extent to which others are interested in Shipping.

LISTE
DES
ARMATEURS ET DES DIRECTEURS-GÉRANTS.

NOTE.—Cette liste mentionne principalement les noms des Directeurs-Gérants. Elle ne comprend donc pas les noms de certains actionnaires importants et n'indique pas non plus quelle part d'intérêt certaines autres personnes peuvent avoir dans l'affaire.
